

Cleaning the PerfectPipe®

The PerfectPipe® can be cleaned as often as you like so you can have a nice clean smoke and to reduce health risks associated with the presence of mold and bacteria in smoking devices.

Follow the simple instructions below carefully.

Caution: Always wear protective gloves (rubber, latex or vinyl).

Prepare a well ventilated area with an exhaust fan (or prepare area outdoors) to prevent the buildup of fumes which can lead to injury or death.

Keep away from open flames! Do not breathe fumes!

Never work with Alcohol in a non-ventilated area!

Use Extreme Caution: Alcohol is Flammable!

1) Pour Isopropyl Alcohol (common Rubbing Alcohol) into the PerfectPipe® Cleaning Tube.

Tip: Our tubes have a reversible lid which seals better when turned over.

When done, you can save the Alcohol & re-use it if you like.

2) Remove filter and screen from pipe(s). Place pipe(s) in the PerfectPipe® Cleaning Tube.

Secure lid in place. Let pipe(s) soak 2 - 24hrs or longer. It will not damage the pipes.

3) Remove pipe(s) and Rinse thoroughly with warm water!

4) Rinse the PerfectPipe® cleaning brush with warm water before applying a little dish soap.

Simply scrub clean. If pipe is not completely clean, repeat steps 2 through 4. Remove any remaining stains on bowl, caused by lighter flame, with a non-scratch scrubbing pad.

5) Rinse pipes thoroughly with Warm Water. Remove as much water as possible and allow to pipes to dry in upright position.

Tip: Final rinse with distilled water to avoid water spots.
