

PerfectPipe® Surpasses Genius Pipe

- **Genius Pipe:** Removes THC/Cannabinoids on Dimpled Cooling Plates
Does Not Remove Burning Particulates
- **PerfectPipe®:** Passes THC/Cannabinoids Through the Micro Fiber Filter
Blocks Burning Particulates

	PerfectPipe®	Genius Pipe
Price	One Pipe \$20 w/all accessories	One Pipe \$80 to \$160
Pipe Material	Borosilicate Glass	Aluminum
Screen Required?	YES	YES
Screen Material	Stainless Steel Only	Stainless Steel / Brass (1)
Size	3/8"	3/4"
Cost	25 SS Screens = \$2.00	12 SS Screens = \$9.95
Filtration Method	Micro Fiber Filter	Cool Plate Condensation
Removes THC?	NO (2)	YES
Removes Ash?	YES	NO
Blocks Sparks?	YES	NO
Bowl Design	Firm Pack	Loose Pack
High Rate Extraction	YES	NO
Hits Per Bowl?	4 to 6	4 to 6
Can you Pre-Load?	YES	YES
Seal In Odors?	YES	NO
Seal In Ashes?	YES	NO

(1) Never use Brass Screens! Brass degasses at low temperatures causing inhalation of toxic gasses!

(2) Using a dirty filter will result in THC loss.

The Genius Pipe:

- Non packable Bowl Design: Inefficient loose packing promotes fire abuse - Fire kills THC on Contact.
- Removes tremendous amounts (or all) of THC with slow draw.
- **Cooling Plate Technology. This is where it fails. Dimpled cooling plates cool THC below vaping/boiling temperature (315°F). THC returns to liquid/oil state and condenses on the cooling plates. Drawing just hard enough to overcome the condensation of THC on the plates, results in very hot hits, burned throat and burning particulates inhaled deeply into the lungs.**
- Does not block sparks or ash.

The PerfectPipe®:

- Scientific Bowl Design: Firm packed efficient burn with fire removed = High Rate THC Extraction.
- Delivers High Levels of THC with slow draw.
- Filter Eliminates Burning Particulates - Reduces Heat & Ash Significantly - THC passes through filter.
- No Sparks Inhaled, Ever = Superior Health Protection.
